Title Index

Aircraft jet engine market, commercial, rate of innovation in, 269
Analogies, methodology for, 289
Bayesian techniques, use in Delphi forecasts, 261
Chemical innovations, influence on future developments, 195
Computer display and analysis of urban information through time and space, 77
Decisionmaking systems, human planning and, learning approach to dynamic modeling of, 125
Delphi and law of diminishing returns (research problem), 225
Delphi forecasts, use of Bayesian techniques in, 261
Delphi panelists, optimism/pessimism consistency of (technical note), 221
Delphi, policy, design of, 149
Dynamic modeling of human planning and decisionmaking systems, learning approach to, 125
Ecological changes, seminar exercise in forecasting, pollution from industrial output, 237
Education for futurism in U.S., survey and analysis, 133
Environment, changing, mankind in world of tomorrow, 235
Environment of the 1970's, remarks on conduct of science in, 115
Forecasts, goals and technological, methods for integrating into planning, 23
Futures studies, policy sciences view of, alternative futures and present action, 3
Futurism in U.S., education for, survey and analysis, 133
Goals and technological forecasts, method for integrating into planning, 23
Human planning and decisionmaking systems, learning approach to dynamic modeling of, 125
IFRC '70, notes on, 105
Information theory, cross-impact matrices, and pivotal events, 53
Jet engine market, commercial aircraft, rate of innovation in, 269
Jet engine, normex forecasting of characteristics, 61
Logic, generalized, use in forecasting, 189
Mankind in world of tomorrow, changing environment, 235
Mapping, system concept for displaying alternatives, 311
Matrices, cross-impact, information theory, and pivotal events, 53
Model of technological growth, Seamans' competitive, a note on (technical note), 107
Model, technology transfer, 321
Normex forecasting of jet engine characteristics, 61
Planning, method for integrating goals and technological forecasts into, 23
Policy Delphi, design of, 149
Policy sciences view of futures studies, alternative futures and present action, 3
Pollution from industrial output, seminar exercise in forecasting ecological changes, 237
Program risks, technological advances and, 277
Research and development planning, examples of technological trend forecasting for, 247
Science, remarks on conduct of in environment of 1970's, 115
Seamans' competitive model of technological growth, a note on (technical note), 107
Social sciences, forecasting methods in, 173
Sociotechnological forecasting, combined approach to methods of, 17
Technological advances and program risks, 277
Technology Assessment Act of 1970 (technical note), 109
Technology transfer model, 321

Trend forecasting, technological, examples for research and development planning, 247
United States, education for futurism in, survey and analysis, 133
Urban information, computer display and analysis of through time and space, 77
World of tomorrow, mankind in, changing environment, 235
